Experience

Pica Tech Ltd – London, UK – 2018 to Present

Role: Founder

- I provide user interface design, website development, digital advertising services to my customers.
- Comfortable managing the entire product creation process or a specific area within, I work equally well independently or in a team and am flexible to travel internationally.
- I have provided graphic design services to a printing company based in London.
- I have been working on two different start-up projects.
 - * One of them is an e-commerce project. I am undertaking the design, development and marketing part of this project.
 - * The other project is a mobile application that allows people living in the same house to carry out their time and housework regularly. My duty on this project take on the user interface and product owner tasks of the application.

Key Projects:

- * Created product and user interface design for Knocknock project based in Poland.
- * I have been creating brand style guide and mobile user interface design for Liverpool based start-up called Appeal.

Freelance – Izmir, Turkey – 2017 to 2018

Role: Freelance Web Designer and Graphic Designer

Created graphic design such as corporate identity and web design for corporate companies from wide range of sectors.

Boga Bilisim Web Technologies – Izmir, Turkey – 2014 to 2017

Role: Web Designer and Digital Marketing Specialist

- I have done many project to companies which are from wide range of industries with Boga Bilisim Web Technologies.
- * Successfully completed many important design and marketing projects.
